

FlueKeeper®

A simple, cost effective product
to keep stored material out of
rack transverse flue spaces

*Provides 3" clearance between
rack and stored material*

*Boltless Front & Rear
connections make installation
possible without removing
any items*

*Spring-loaded Fluekeeper is easy for maintenance personnel
to install from the aisle side of the rack - requires no special
tools or skills*

FlueKeeper from DACS US Patent #7,857,152

- Allows your sprinkler system to function as designed
- Combined with 3" rack post width totals 6" flue space
- Reduces staff "housekeeping" duties
- Satisfies local building inspector criteria
- Available for new installations or scheduled retrofit plans
